

INBRED MAIZE LINE PHA9G

Abstract

A novel inbred maize line designated PHA9G and seed, plants and plant parts
5 thereof. Methods for producing a maize plant that comprise crossing inbred
maize line PHA9G with another maize plant. Methods for producing a maize
plant containing in its genetic material one or more traits introgressed into
PHA9G through backcross conversion and/or transformation, and to the maize
seed, plant and plant part produced thereby. Hybrid maize seed, plant or plant
10 part produced by crossing the inbred line PHA9G or an introgressed trait
conversion of PHA9G with another maize line. Inbred maize lines derived from
inbred maize line PHA9G, methods for producing other inbred maize lines
derived from inbred maize line PHA9G and the inbred maize lines and their parts
derived by the use of those methods.
